

SUSTAINABILITY POSITION STATEMENT

September 2024

Statement:

Baker Street Quarter Partnership is committed to promoting and increasing sustainability for the area and in our own operations. We are committed to ensuring environmental and social impact so that the area and our organisation are places where everyone is welcome, supported and can thrive.

Approach:

Sustainability is at the core of our operations and strategic planning. We work to the principles of BioRegional's 'One Planet Living' framework to measure and drive forward our sustainability delivery and objectives.

We work to achieve sustainability for the area and our community by:

- Providing support and facilitation for our business members in achieving net carbon zero
- Collaborating with members and partners to facilitate the delivery of sustainable, healthy, high quality public spaces
- Nurturing a connected and caring community
- Promoting, enabling and inspiring a sustainable workplace, retail, leisure and hospitality experience for all

We recognise that the path to sustainability is a continuous journey and are dedicated to working in partnership with all local stakeholders to adapt, contribute to and evolve our strategies to meet the challenges and opportunities of tomorrow.
